- ☐ Datetime complete

Marker size:

A horizontal bar chart titled 'Hyperparameter Importance' showing the relative importance of four hyperparameters. The y-axis lists the hyperparameters: 'weight_decay', 'lr_fine', 'lr_head', and 'dropout'. The x-axis represents the importance score, ranging from 0 to 0.8 with major ticks every 0.2. The bars are colored in a light blue. The importance values are explicitly labeled at the end of each bar: 'weight_decay' is 0.7, 'lr_fine' is 0.17, 'lr_head' is 0.02, and 'dropout' is 0.02.

Hyperparameter	Importance
weight_decay	0.7
lr_fine	0.17
lr_head	0.02
dropout	0.02

Figure 1 is a step plot showing the number of trials completed (blue) and pruned (orange) over time. The x-axis is Datetime (Dec 20, 2025 to Dec 21, 2025) and the y-axis is Trial (0 to 30). The plot shows a steady increase in trials, with a significant jump in pruning starting around 00:00 on Dec 21, 2025.

Datetime	Complete	Pruned
22:00 Dec 20, 2025	0	0
23:00 Dec 20, 2025	1	0
00:00 Dec 21, 2025	2	0
01:00 Dec 21, 2025	3	0
02:00 Dec 21, 2025	4	0
03:00 Dec 21, 2025	4	7
04:00 Dec 21, 2025	4	10
05:00 Dec 21, 2025	4	12
06:00 Dec 21, 2025	4	14
07:00 Dec 21, 2025	4	19
08:00 Dec 21, 2025	4	26
09:00 Dec 21, 2025	4	29
